FOR IMMEDIATE RELEASE

March 21, 2024

**AMPTRICITY OFFICIALLY LAUNCHES SOLID-STATE ENERGY STORAGE
FOR RESIDENTIAL AND COMMERCIAL USE**

The 12 kWh residential system demonstration will coincide with NASCAR at COTA in Austin where the company will sponsor Driver Timmy Hill.

- Amptricity demonstrates its first next-generation, solid-state technology for 12 kWh home energy storage, commercializing battery capabilities.
- Solid-state battery technology benefits include affordability, elimination of safety hazards, 3x performance over existing second-generation battery technology, and improved sustainability.
- Amptricity plans to build its first U.S. manufacturing facility, which could produce up to 2 GW. Site selection is underway in Texas, Florida, Illinois, Georgia, Arkansas, North Carolina, and South Carolina.

[DALLAS, TX, March 21, 2024] — Amptricity, a developer and manufacturer of proprietary solid-state battery technology, announces its official launch today, demonstrating its residential system to coincide with the NASCAR at Circuit of the Americas (COTA) in Austin, Texas. Systems begin full production in Q2 2024, with delivery in Q3 2024. Capacity allocation is 40,000 units for 2024 and 100,000 units for 2025.

"We delayed our 2023 release to focus on productizing the entire stationary line that will fulfill our strategic goal, aimed at lowering the price for the residential and commercial market," said Damir Perge, Amptricity CEO and Co-Founder. "Demonstrating our system in Austin, Texas, we want to send a message to our prospective customers that we are more technically advanced with a lower total cost of ownership."

Amptricity has 15 commercial product configurations to address every market up to 4 MWh units, to address residential, commercial, industrial, municipal, utilities, and renewables like solar and wind, and it is [accepting pre-orders](#) now.

Sponsoring the #66 Chevy Camaro in the Circuit of the Americas (COTA)

As part of its official launch, Amptricity sponsors NASCAR driver Timmy Hill with the #66 Ford Mustang, owned by MBM Motorsports, in the COTA event on March 24.

About Amptricity

Amptricity, founded in 2020 and headquartered in Dallas, Texas, is co-founded by a global team of engineers and renewable-industry experts who have commercialized solid-state technology to expand its use beyond cell phones and computers. Its proprietary formula includes a cell capacity up to 3,000 Ah with up to 11,000 discharge cycles. For consumers and commercial, this next-generation battery technology means up to 8 hours of discharge, simultaneous charging and discharging, no thermal runoff, zero toxicity, 100% recyclable, and fully functional in extreme cold and hot temperatures.
